# firefly pendant

Change and modernization: Firefly is an unexpected suspended firefly.

The suspension version of the product was created to valorize garden furniture such as gazebos and pergolas, or to create effects on plants and trees. The installation system makes the luminaire versatile and adaptable to the most particular outdoor needs.

A resistant and performing product, an atmospheric light spread through the opal PMMA element. The luminaire is fitted with a light source in LED technology, white, monochromatic with 2 W power or RGBW (by request).

Available in graphite, oxide, white and green finishes.
