

# INCISO Q4 48V

The 48V track INCISO Q4 is a projector for interiors with unique characteristics. In fact it is the first projector made in DurCoral® cement with a steel core. INCISO Q4 48V retains the same technical characteristics as the Q4 48V, but from the aesthetic point of view, the use of DurCoral® allows the material to be molded and engraved to create patterns that make it unique in its category. The research into the materials that characterize the Buzzi & Buzzi collection combine with the IRON technology to create an innovative product. DurCoral® is a material twice as resistant as cement, scratch-proof, customizable with any type of paint and has high mechanical performances.
