

The adjustable  
hexahedron.

kuboid

kuboid

Defining, enhancing, customizing and transforming external architecture.

Outdoor light that integrates with the architecture, makes the spaces livable, gives them volume and shape. When necessary it creates hypnotic or relaxing atmospheres, made possible by an excellent technique.

Intelligent, reasoned, programmed lighting. Nothing is left to chance, in continuous dialogue with the natural light. Perfect lighting designs, thanks to the possibility of providing a management control that makes even the simplest of products optimal.

[LND]

designplan® 

**Perfect form elevated to the highest power.**

**Regular polyhedron, with six sides and twelve identical corners.**

The cube, anchored at the sides by twelve right angles, is a figure which represents stability, a powerful and essential solidification. If the circle is unstoppable dynamism, the cube is its majesty, a form which is always the same; and what both have in common is the sense of perfection.

The Cube is a wonderful example of the rigor of nature, of the great richness of natural laws: it is a perfect example of the possibilities of the human mind to test its own scientific rigor and to dominate itself.

Ernő Rubik  
designer e architetto ungherese

+  
plus

Maximum adjustability

Kuboid is synonymous with extreme versatility, a quality generated by the possibility of rotating the light fitting  $\pm 120^\circ$  on the horizontal axis and  $90^\circ$  on the vertical one.

A geometric selection which is never the same, thanks to the special joint in pressure die-cast aluminum which makes Kuboid the perfect choice in any outdoor context.

## Versatile mounting

Kuboid is a technological light fitting in concept and creation.

In fact, in the small, medium and large versions, it offers four possible applications: ceiling, wall, floor and ground installation via steel stakes.

Outdoor living takes on a new quality, thanks to the infinite light of Kuboid, which can be adjusted and directed according to individual technical-lighting needs.

Ceiling application via a ceiling fixture plate.

Wall application thanks to the special wall fixture plate.

Floor application, thanks to the floor fixture plate.

Special steel stake for ground application.

PRODUCT RANGE

Kuboid can satisfy all project requirements thanks to a range composed of three different sizes:  
small (3.54" x 3.54" x 3.54"),  
medium (4.72" x 4.72" x 4.72"),  
large (6.30" x 6.30" x 6.30").

# The adjustable hexahedron.

kuboid

design by Landa R&D

# kuboid 90

Compact, unique.

In the small version with 3.54" side with 6W power, Kuboid is versatile and can fit into any space. The light fitting is available with diffused emission with opal glass and spot, medium and flood light beams, with silk-screen printed glass, Kuboid is a perfect cube composed of a dissipating, adjustable body in pressure die-cast aluminum. The look can be personalized in 4 different powder finishes, graphite, oxide, white and black, with remote electronic power supply.

The product, adjustable  $\pm 120^\circ$  on the horizontal axis and  $90^\circ$  on the vertical one, can be installed on the wall, ceiling and floor, or on the ground with installation using a special stake.

# kuboid 120

4.7" x 4.7" x 4.7" of perfection and power.

Kuboid 120 is solid, precise and indispensable. A projector available with spot, medium and flood light beams with silk-screen printed glass and diffused beam fitted with opal glass, installable outdoors on the wall and ceiling or on the floor, and on the ground using the special stake. Characterized by a cubic body in pressure die-cast aluminum EN47100, the light fitting is adjustable  $\pm 120^\circ$  on the horizontal axis and  $90^\circ$  on the vertical one, for perfect lighting in any type of space. Resistant even in extreme conditions, Kuboid 120 is perfect for outdoors, and is available with graphite, oxide, white and black finish.

# kuboid 160

The large version in the Kuboid projector range, with 6.3" side.

A light fitting with 24/25W power and available with spot, medium and flood light beams and in the version with emission of diffused lighting. The degree of protection IP67 makes Kuboid 160 the perfect choice for lighting facades, porches and entrances. The cubic body, thanks to a mechanically cutting-edge joint, can be adjusted  $\pm 120^\circ$  on the horizontal axis and  $90^\circ$  on the vertical one. Versatile and precise, it can be installed on the wall, ceiling and floor and on the ground using the dedicated stake. The finish which covers the pressure die-cast aluminum EN47100 body is available in graphite, oxide, white and black.
