Mimicry

THE ESSENCE OF ABSENCE

Mimicry is a decorative fixture that integrates perfectly into architecture, suitable for wall installation.
The base is made of die-cast aluminum, treated with cataphoresis and a layer of polyester powder paint resistant to outdoor environments.

A key feature is the baked clay cover, with a textured feel, which can be used in its natural state or painted with water-based colors, making it fully customizable by the end user.
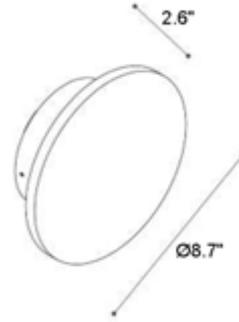

- Mimicry is sold ready to be painted; if you want to use it with a natural finish, it must be specified when ordering, and a specific protective treatment will be applied.

- The base of Mimicry is only available in white.
