

POLARIS

Polaris is a totally disappearing direct light recessed indoor luminaire made of AirCoral®, installable on plasterboard ceilings. It has a bright cupola made out of a composite unloaded material capable of reflecting the source light and spread it out indirectly in the room. Not just a light source but also a precious furniture item, that speaks the language of functionality. As a matter of fact, Polaris can be lifted from the support and be used as trapdoor for the inspection of the false ceiling.
