

RHINO

Rhino, an indoor totally disappearing recessed luminaire made of Coral®, installable on plasterboard ceilings or walls, is a versatile product, characterized by an extractable recess with interchangeable lens. It enlightens spaces perfectly and in a very incisive way, enriching them with ever-changing plays of light. The projector can be oriented in several ways, in a completely external position or in a recessed one. The latter, conceived to obtain a minimal visual impact. When the projector is not recessed it is 360° adjustable on the horizontal line and 90° on the vertical one.
