

The Slim range is the longer, slimmer variant of the 'original' Normall. The Slim combines timeless design with state of the art, energy efficient LED units. The pure and simple lines result in a sleek, elegant and minimalistic design. The curved back is optimized to create a great indirect lighting solution. Our suggestion is to use Slim by the pair, as an uplight or downlight. The range is fully paintable, which ensures Slim will blend perfectly with your interior. And if you decide to redecorate the place in a number of years, the wall fixture will just adapt to your new desires.
