*The body is made of DurCoral®, a high-performance "hi-tech" material born
from the union of Coral® and cement. It is an aggregate twice as hard as
concrete, which allows very high performances in terms of quality, flow and
resistance and that, above all, differs from other outdoor materials, for the
possibility of being treated with any type of paint and finish. Distinguished
by the ability to resist abrasion, insensitive to ultraviolet rays, pollution and
atmospheric agents is certainly the ideal material to be placed outdoors.*
