Sensor area

The sensor is located on the side of the cable entry in the lamp base. (Position depends on installation direction)

Dimming

Place the dimming pen in the sensor area. As soon as the green feedback LED lights up, the sensor is activated and the spotlight is dimmed. The dimming process stops by removing the pen. When the dimming pen is attached again, the dimming direction is changed. Your set dimming is automatically saved after approx. 5 - 10 seconds.

The dimming range is flicker-free adjustable from 100% to 10% in 256 steps. The spotlight is set to 100% at initial start-up.
