

# GENIUS BASIC

The miniaturised version of Genius is now available with Genius Basic: a version with more compact dimensions, made in Coral®. A totally recessed luminaire for indoor use, Genius Basic satisfies Contract Business needs, with the usual technical reliability of Buzzi & Buzzi. An efficient product with high performances, able to achieve 660 lm emission from the usual 0.79" (20 mm) hole, but even more compact and installable in a cavity of only 3.15" (80 mm).

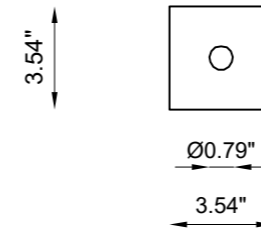

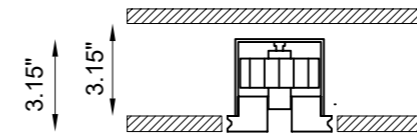

As in the whole Genius range, the Basic version has an electrical part which can be removed through the light hole, thanks to a mechanism that makes it easy to pull the LED light source out and replace it. The only visible aperture is the light emission hole measuring 0.79" (20 mm), so there is no need for any inspection hatch, nor for invasive maintenance operations.
