

GENIUS

1000 lm IN A DIAMETER OF ONLY 0.79" (20 mm), EASY MAINTENANCE.

A bright product starting from its shape, discreet and elegant, able to perfectly integrate itself inside architecture, achieving extraordinary complete disappearance effects. Genius guarantees a perfect lighting in every environment it may be installed in: totally disappearing recessed luminaire for indoor spaces, made of AirCoral® and installable on plasterboard or brick ceilings. Able to emit an incredible light intensity for just a 0.79" (20 mm) emission hole, so tiny that it disappears when the product is turned off.

With a simple hand gesture, the electric part can be extracted directly from the hole which allows the light to pour out. This is possible thanks to the push-pull mechanism, which makes the eventual extraction and replacement of the LED source easier in case of maintenance.
