PILLAR MEGA

LAM32
IDEAS BECOMING LIGHT

Luminaire designed for floor installation in urban or private areas. Suitable for power LED sources, it is composed of aluminum head submitted to anodizing treatment up to 18 microns. The pole in extruded aluminum is welded to the base plate along all the circumference of the luminaire. All parts are polyester powder coated to ensure durability over time and maximum resistance against atmospheric agents. PMMA Road optics. The closing screen made of extra-clear transparent, tempered and screen-printed glass is integral to the body through a special glue-sealant used in shipbuilding. The protection degree IP66 is guaranteed by a special waterproof cable. Luminaire's installation is allowed thanks to screws for direct fixing to the floor or appropriate flush fixing counter-plate in steel sheet with anchor bolts for concrete planting. Compartmented lamp with 11.81" long neoprene cable for connection to the supply line through appropriate waterproof connection systems to be ordered separately. Connection inside the pole.
