# lako

*An asymmetrical light with single or double emission, a bollard available in three different heights 7.1", 15.8" or 23.6" and perfect for the functional lighting of walkways or driveways of parks and gardens. The lens is opal, the design is modern, functional and minimalist and can always be perfectly integrated into the design context, thanks to the very high adaptability of the graphite powder paint finish.*

*Technological but simple, minimal in its 3D: Lako's cylindrical body is resistant and made of die-cast extruded aluminum.*
