morphis_1

Morphis_1 is the tradition, a luminaire able to live in many solutions and environments. The Morphis_1 wall lamp has 15W power and a transparent or opal polycarbonate screen with diffusing optics. The optimizations made on the component couplings perfectly define the light emission. The body is in die-cast aluminum and available in six external finishing options, for a sophisticated final design, ideal for access corridors and external facades.

morphis_2

A classic wall lamp, with all the Landa's technology and innovation. Diffusing light ideal for all applications for a luminaire with transparent polycarbonate screen. The optimizations made on the component couplings allow perfect definition of the light emission. Morphis_2 can be wall-mounted with shelf for suspended luminaires and 29W power.

morphis_3

Morphis_3, with 29W power, offers an additional possibility of application by means of a shelf for suspended luminaires. The six aesthetic finishing solutions offer the installer many aesthetic possibilities. Its diffused light is precise thanks to the extra-clear transparent polycarbonate screen. A perfect solution for porches and external facades of homes and outdoor common areas, thanks to the optimizations made on the component couplings, which not only perfectly define the light emission, but also increase the product resistance in all external situations.

morphis_4

Tradition, technology and design for a device that can live in multiple solutions and environments. Morphis_4 closes the circle of the Morphis range. Diffuse optics with opal polycarbonate diffuser, 29W power and six aesthetic finish solutions. The luminaire is wall-mounted by means of a 90° arm; the design of the die-cast aluminum body is compact and non-invasive for uniform and penetrating zenithal light. All the optimizations made on the component couplings allow perfect definition of the light output.
