

Athena

A connected lighting solution for smart buildings
& elevated human-centric experiences

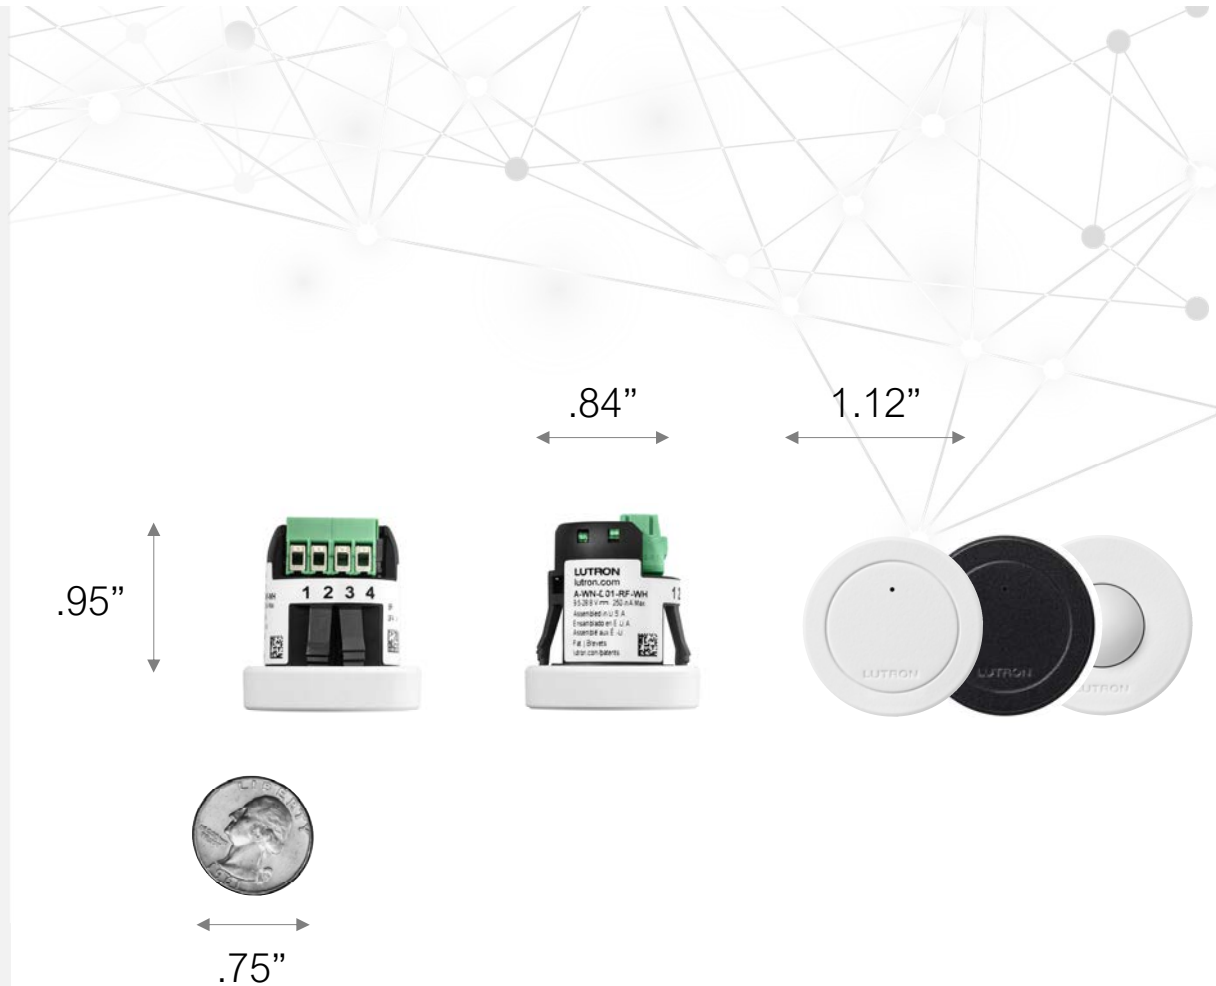

Athena Wireless Node

Available for Project Specifications Starting August 22, 2022

Enabling Athena with the Athena Wireless Node

- Individual Fixture Controller
- Ultra small form factor
- Wireless Clear Connect Type-X
- Tunable White or Static White
- Loaded with Technology
- Sensor Option Coming Soon

All from a single, flexible device

(Actual sizes)

More connected, more flexible

Athena with Athena Wireless Node

Simplify Design Decisions

With Athena Wireless Node, Athena is universal –

- Wireless or Wired
- Centralized or Decentralized
- Simplifies tunable white
- Fixture of your choice
- Integrated with shades & Ketra

Deliver an Insightful, Appreciating Asset

Connected to the cloud, Athena Wireless Node –

- Optimizes energy savings at the fixture level
- Leverages an existing building system
- Continually updates with new features
- With sensor, collect granular occupancy data
- Creates an infrastructure of data nodes
