

TRIXIE ROUND

- Slim rectangular or round luminaire for installation on wall – surface or recessed.
- Configuration: die-cast aluminum structure, EN AB-47100 alloy (low copper content). Moulded transparent polycarbonate emitting unit (rectangular) or transparent polyurethane resin filling (round) and polished aluminum reflector fixed by double-sided technical tape.
- Double layer coating for high resistance to corrosion: the aluminum components are painted with a double coat using powders which are compliant with QUALICOAT standards: a first layer of epoxy powder (with excellent chemical and mechanical resistance) and a second finishing layer of polyester powder (resistant to UV rays and atmospheric agents). The entire painting process of the aluminum fitting starts from components which have been sandblasted in advance to make the surface more porous and increase the adherence of the paint. Ares effects alkaline and acid washing to clean the surfaces completely, then rinses with demineralised water to remove any residue particles, subsequently a chemical conversion treatment is done to protect against rusting.
- Protection rating: IP65
- Installation: the luminaire is equipped with a piece of cable for an easy-to-make connection. 24V feeding: power supply installed in a remote position; Outdoor use requires suitable flexible cables.

Recessed wall fitting.

Wall fitting

Pre-wired with approx 9.84" of cable.

Remote device required.

Protection against impact.
IK08 - 5.00 joule
