

Nail

STEADY LIKE A LIGHTHOUSE THAT GUIDES SAILOR HOME

Pole top made of die-cast aluminum, finished with cataphoresis treatment and a layer of polyester powder coating, resistant to outdoor environments.

Nail is characterized by a clean and essential design, efficient and adaptable to any type of installation.

Equipped with Power LEDs in 3000K color temperature, it is available in two versions: with optics or with a diffused beam, thanks to frosted glass.

The power supply is integrated into the pole, using a special sealed capsule that is easy to install with connectors.

The variety of pole heights and the available in sand and white colors make NAIL suitable even for residential settings.
