

WHAT ABOUT

Is an innovative material made from natural minerals and aggregates that make it extremely resistant to high temperatures and shocks and result in surfaces that are smooth-to-the-touch but at the same time shock and scratch proof.

**PAINTABLE**  
customization

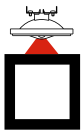

**NOT TOXIC**  
application in hospitals or in bio-architecture

**NO EXPANSION**  
absence of cracks in the installation

**NOT FLAMMABLE**  
absence of toxic smokes

**THERMAL RESISTANCE**  
large choice of light sources

**ANTI-ALLERGIC**  
application in hospitals or in bio-architecture

**DUST REPULSIVE**  
no maintenance necessary

**HIGH RESISTANCE TO TEMPERATURE SHOCKS**  
installation in multiple purpose conditions

**WHITE SATIN SURFACE**  
touch comfortable, velvet effect

**ABSENCE OF CHEMICAL REACTIVITY**  
use in public surroundings (hospitals, spa)

**UV RESISTANT**  
permanent

**HARDNESS**  
high cut hardness

**LOWEST THERMIC CONDUCTIBILITY**  
application in accessible areas
