Bottega

7

*"Design can be art.
Design can be aesthetics.
Design is so simple,
that's why it is so
complicated."*

- Paul Rand (American Designer)

AGENCY

About us

Bottega7 is an Italian company founded in 2013, thanks to the will of Eng. Amedeo Massocco, its founder, who has thirty years of experience in the manufacturing industry in mechanical companies oriented to the realization of products for the public lighting and street furniture sector.

The skills and knowledge acquired over the years have led to the fulfilment of excellent projects in the industry, confirming great results both in Italy and abroad.

Bottega7 has been able to showcase their study capabilities at its best by putting it at the service of innovative projects, specializing in the support of the designer in the customization of urban furniture lines that can adapt to individual design needs both from an architectural and environmental point of view, by providing the skills of its team for the industrialisation of ad hoc products.

| COMPANY BOTTEGA7

AGENCY

Our philosophy

Since its inception, Bottega7 has aimed to make its professionalism available to clients, offering its ideas and mechanical engineering expertise applied to the processing of various materials, to create lighting collections and urban furnishings capable of enhancing spaces with innovative products seamlessly integrated into specific architectural contexts..

Bottega7's philosophy is to accept the challenge of each project, by showing its ability to develop unique collections integrating its products into the architectural landscape of cities, with special attention to eco-sustainability and energy saving.

PRINCIPLES

Bottega7's **strengths** are the following:

- Flexibility;
- Knowledge of different materials and their related processing;
- Excellent design and development hub for customized products;
- Realization of exclusive projects with high-tech construction solutions, many patented and owned by Bottega7;
- LED stainless steel luminaires with lenses and optics of different types, suitable to meet the most varied design needs;
- Particular attention to light pollution and the different needs of colour, light, and design.

PRODUCTION

The know-how and skills of the designers, professionals, specialized technicians, and founder make Bottega7 an Italian company specialized in the production of lines and collections of poles for architectural lighting and for urban outdoor furniture, for particularly hostile environments, where materials such as stainless steel and similar are required.

Production flexibility is largely in line with our philosophy: provide each unique project with Italian high-level craftsmanship and specialization in different fields

DESIGN AND CUSTOMIZATION

Every day Bottega7 engineers and designers develop and research specific and exclusive solutions (most of those patented by us). Our constant commitment guarantees the high standards and quality of Made in Italy, a value that we are committed to respect and to promote in all the countries of the world, where we send our products.

In the design phase the control is continuous and constant with technical and optical, photometric, and mechanical tests. Thanks to our designers and collaboration with architects and lighting designers, the beauty and flexibility of our products is highly sought after in every single project.

Bottega7 accepts the challenge of competent urban planners and architectural firms every day, who propose innovative creations of lighting poles for urban furniture.

Pole Linea S

Product details

Made of hot galvanized steel powder coated with possibility to choose any RAL colour.

Lighting fixture

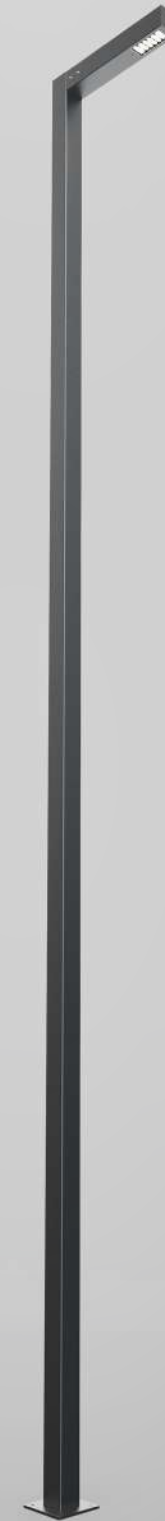

Made of stainless steel, designed to allow the use of LED modules with different optics and powers.

Ground fixing

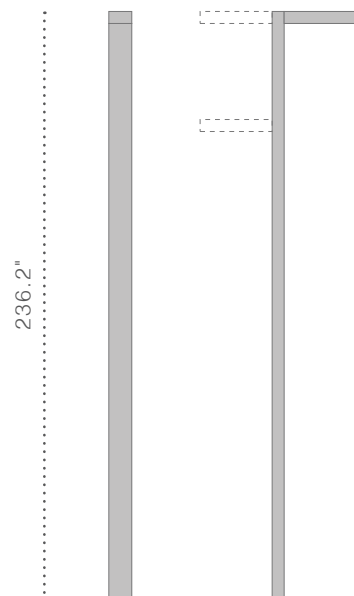

Base flange with anchor bolts or rooted in the ground.

Height

Available at 19.7' (6 m) fixed to the ground via base flange or at 18.0 ft (5.5 m) rooted in the ground.

Pole Linea SR

Product details

Made of hot galvanized steel powder coated with possibility to choose any RAL color. It differs from the Linea S by its rectangular section.

Lighting fixture

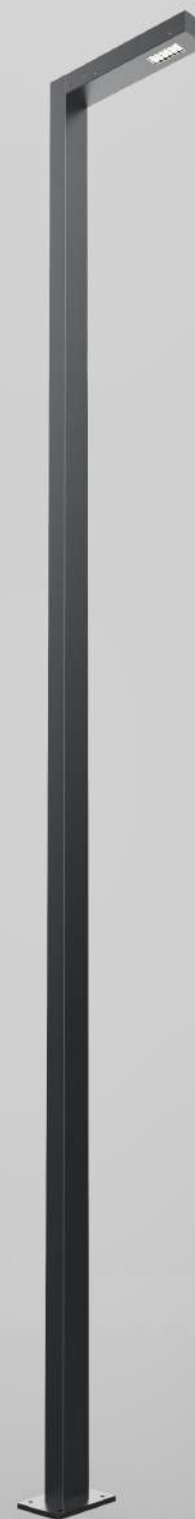

Made of stainless steel, designed to allow the use of LED modules with different optics and powers.

Ground fixing

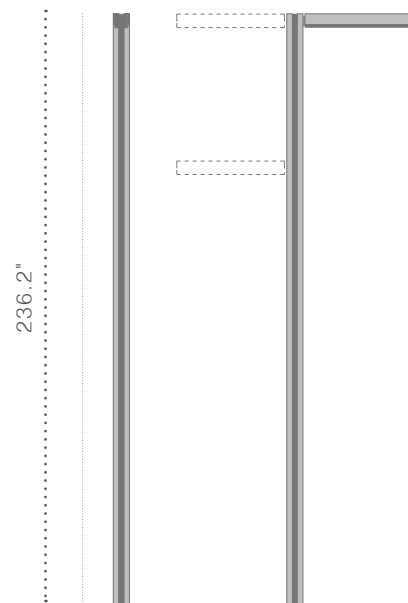

Base flange with anchor bolts or rooted in the ground.

Height

Available at 19.7 ft (6 m) fixed to the ground via base flange or at 18.0 ft (5.5 m) rooted in the ground.

Pole Linea

Product details

Made of stainless steel powder coated with possibility to choose any RAL color.
Decorative aluminum corners.

Lighting fixture

Made of stainless steel, designed to allow the use of LED modules with different optics and powers.

Ground fixing

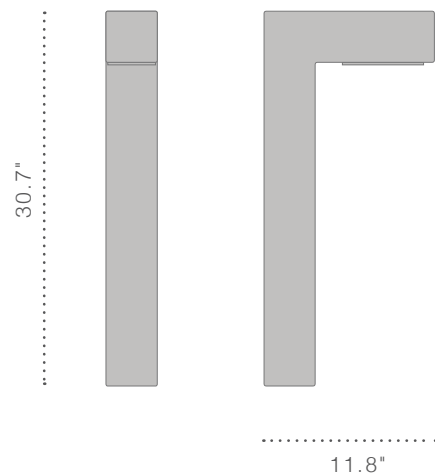

Base flange with anchor bolts or rooted in the ground.

Height

Available from 13.12 ft to 26.3 ft

Bollard S

Product details

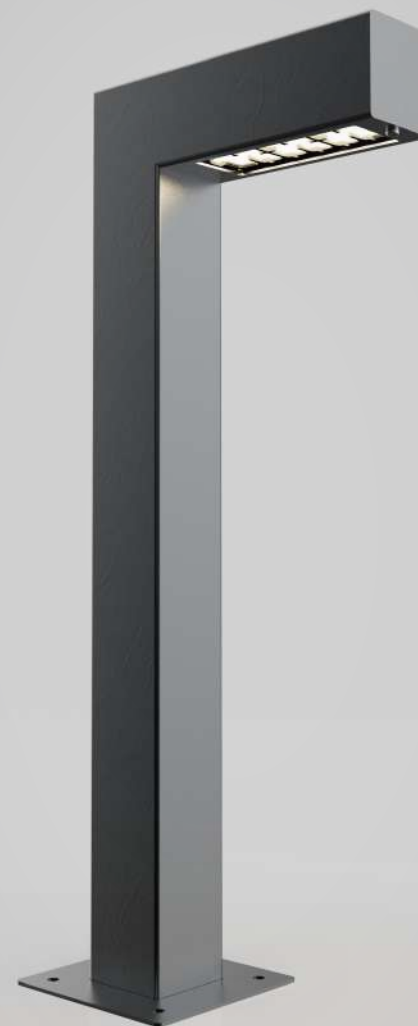

Made of stainless steel powder coated with possibility to choose any RAL color.

Lightning source

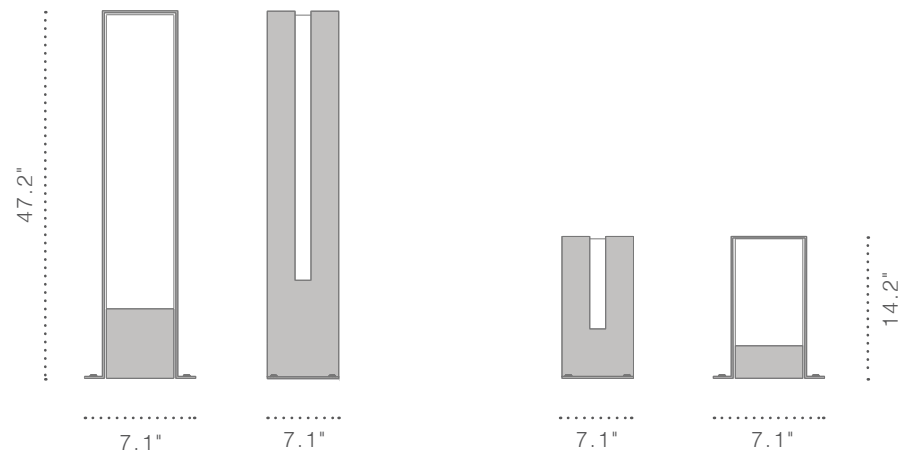

Designed to allow the use of LED modules with different optics and powers.

Ground fixing

Base flange with expansion anchor.

Bollard

Product details

Made of stainless-steel powder coated with possibility to choose any RAL color.

Lightning source

LED strip.

Ground fixing

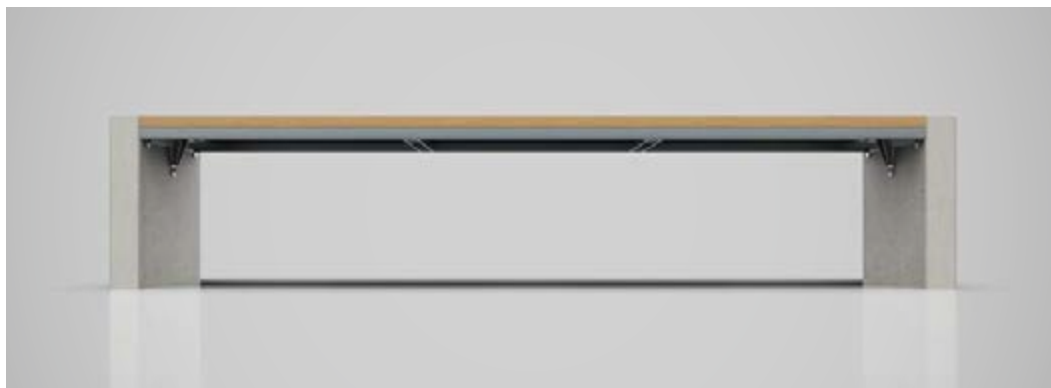

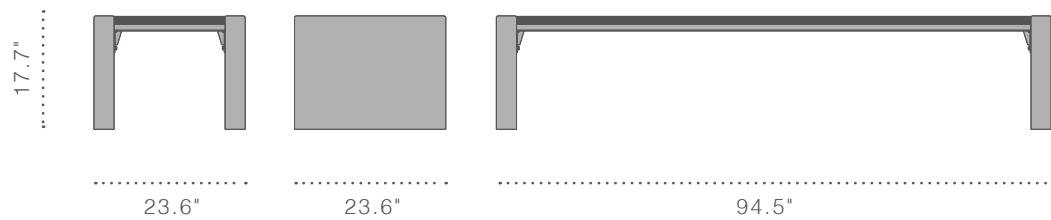

Base flange with expansion anchor.

Notes

Lens made of PMMA.

Bench

Product details

Seat made of hardwood and frame in HUPC and stainless steel powder coated with the possibility to choose any RAL color.

Ground fixing

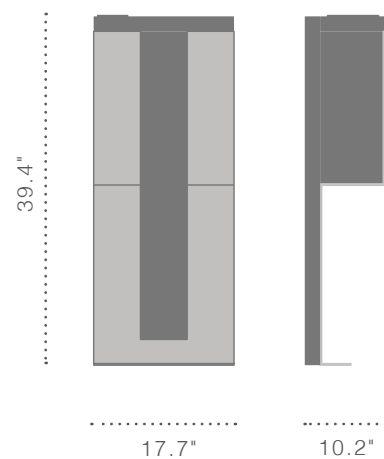

Base flange with expansion anchor.

Notes

Seat made of hardwood.

Litter Bin

Product details

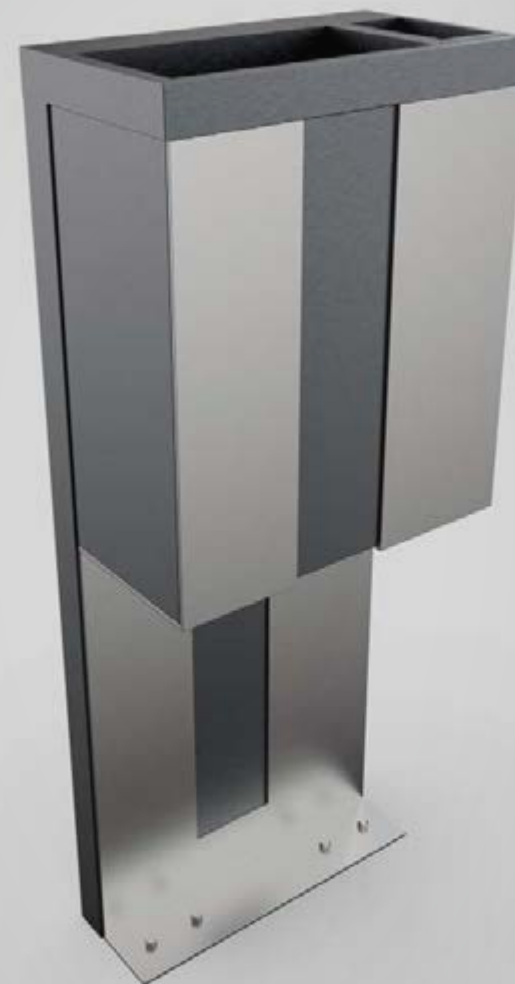

Made of stainless steel powder coated with possibility to choose any RAL color.

Ground fixing

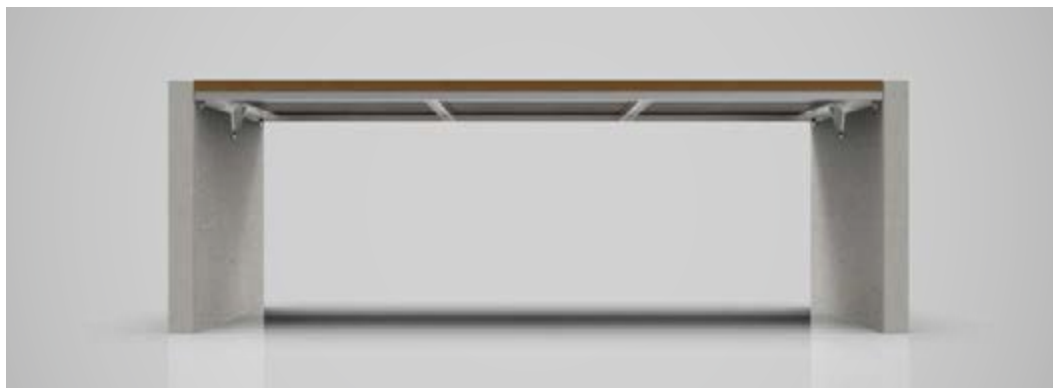

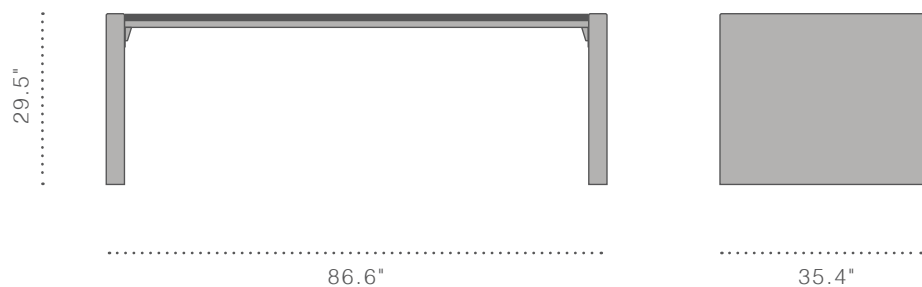

Base flange with expansion anchor.

Notes

Available with or without ashtray.
Capacity 9.25 gallons.

Table

Product details

Tabletop made of hardwood and frame in HUPC and stainless steel powder coated with the possibility to choose any RAL color.

Ground fixing

Base flange with expansion anchor.

Notes

Top made of hardwood.

Made of stainless-steel powder coated with the possibility to choose any RAL color.

Ground fixing

Base flange with expansion anchor.

| FILO COLLECTION

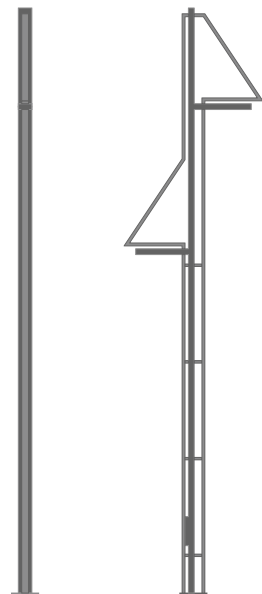

FILO

"Life is a mess of tangled wires; The fun lies in the search of the main thread."

*- Candida Riva
(Italian painter)*

Pole Filo

Product details

Made of hot galvanized steel; powder coated with possibility to choose any RAL color.

Lighting fixture

Made of stainless-steel, designed to allow the use of LED modules with different optics and powers.

Ground fixing

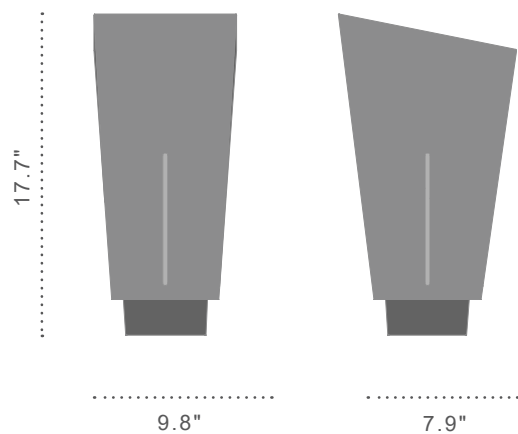

Base flange with anchor bolts.
or rooted in the ground.

Height

Available from 16.4 to 26.2 feet.

Lighting Bollard

Product details

Made of stainless-steel powder coated with possibility to choose any RAL color.

Lighting source

E27 LED lamp.

Ground fixing

Base flange with expansion anchor.

Bench

Product details

Made of hot galvanized steel powder coated with possibility to choose any RAL color.

Ground fixing

Base flange with expansion anchor.

Notes

Seat made of hard wood.

Wall Bracket

48.4"

5.5"

26.9"

Product details

Made of stainless-steel powder coated with possibility to choose any RAL color.

Lighting fixture

Made of stainless-steel, designed to allow the use of LED modules with different optics and powers.

Wall mounting

Expansion anchor.

| DIAPASON COLLECTION

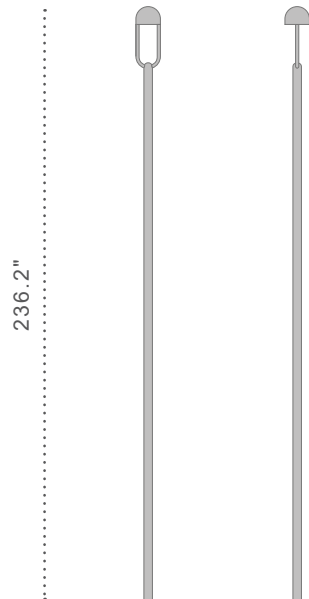

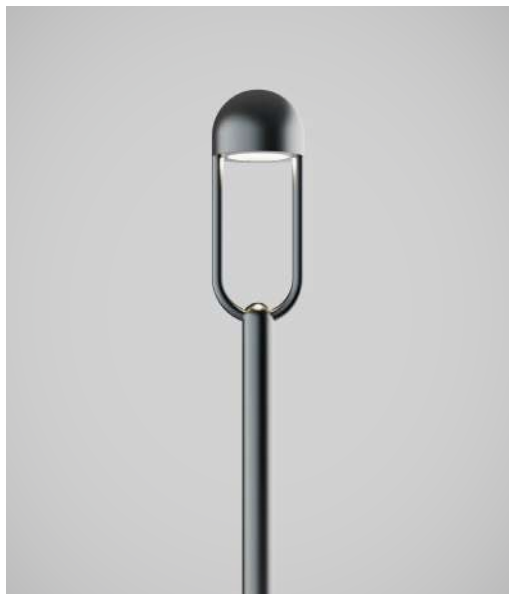

DIAPASON

*"We are illed with echoes
that keep resonating within
us, even long after we have
lost the original sound."*

- Fabrizio Caramagna

Pole Diapason

Product details

Made of hot galvanized steel powder coated with possibility to choose any RAL color.

Lighting fixture

Made of stainless steel, designed to allow the use of LED modules with different optics and powers.

Ground fixing

Base flange with anchor bolts or rooted in the ground.

Height

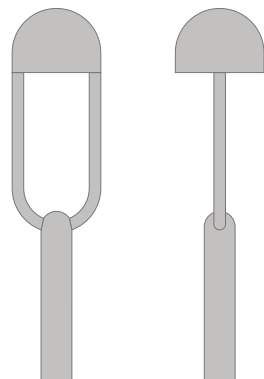

Available at 19.7 ft fixed to the ground via base flange or at 18.0 ft rooted in the ground.

Lighting Bollard

39.4"

9.1"

Product details

Made of hot galvanized steel powder coated with possibility to choose any RAL color.

Lighting fixture

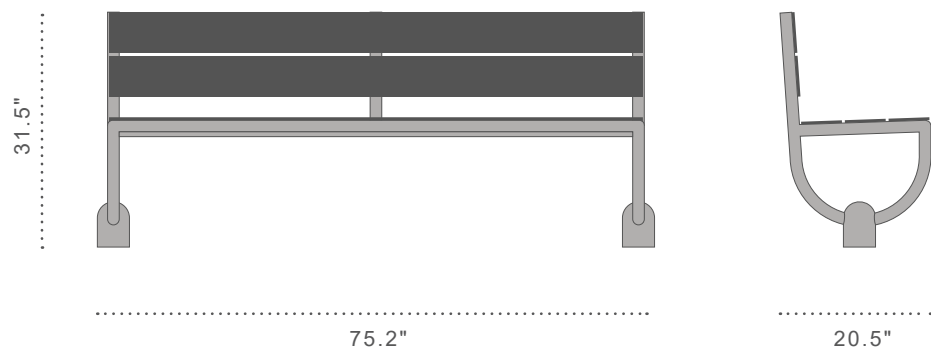

Designed to allow the use of LED modules with different optics and powers.

Ground fixing

Base flange with expansion anchor.

Bench

Product details

Seat made of hard wood and frame in hot galvanized steel powder coated with the possibility to choose any RAL color.

Ground fixing

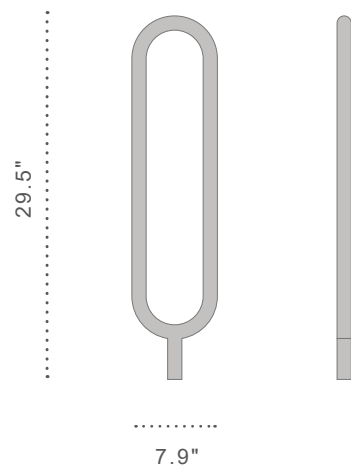

Base flange with expansion anchor or rooted in the ground.

Notes

Seat made of hardwood.

Bike Rack

Product details

Made of hot galvanized steel powder coated with possibility to choose any RAL color.

Ground fixing

Base flange with expansion anchor.

| SATURN COLLECTION

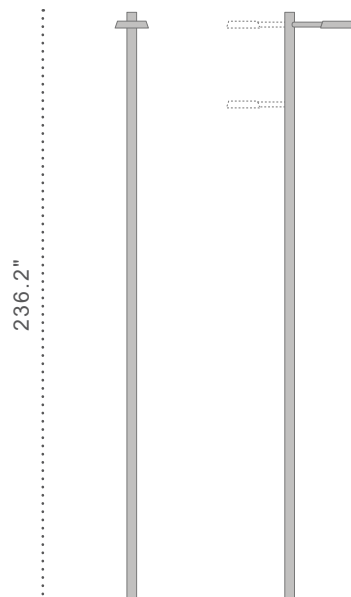

SATURN

"Saturn, with its reflected light rings, dances through the cosmic expanse like a beacon in the silence of the universe."

- Anonymous

Pole Saturn

Product details

Made of hot galvanized steel powder coated with possibility to choose any RAL color.

Lighting fixture

Made of stainless steel, designed to allow the use of LED modules with different optics and powers.

Ground fixing

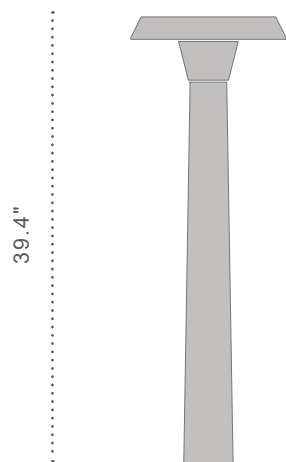

Base flange with anchor bolts or rooted in the ground.

Height

Available at 19.7 ft fixed to the ground via base flange or at 18.0 ft rooted in the ground.

Lighting Bollard

Product details

Made of hot galvanized steel powder coated with possibility to choose any RAL color.

Lighting fixture

Designed to allow the use of LED modules with different optics and powers.

Ground fixing

Base flange with expansion anchor.

Wall Lantern

Product details

Made of stainless steel powder coated with possibility to choose any RAL color.

Lighting fixture

Made of stainless steel, designed to allow the use of LED modules with different optics and powers.

Wall mounting

Expansion anchor.

Mass and Power, 1960*

Altimi

Product details

Available in the following materials:

- Hot galvanized steel
- Stainless-steel
- Aluminum

painted with possibility to choose any RAL color.

Lightning source

LED strip.

Ground fixing

Base -lange with anchor bolts
or rooted in the ground.

Height

Available from 9.8 to 26.2 feet.

Altimi X

Product details

Available in the following materials:

- Hot galvanized steel
- Stainless-steel
- Aluminum

painted with possibility to choose any RAL color.

Lightning source

COB LED.

Ground ixing

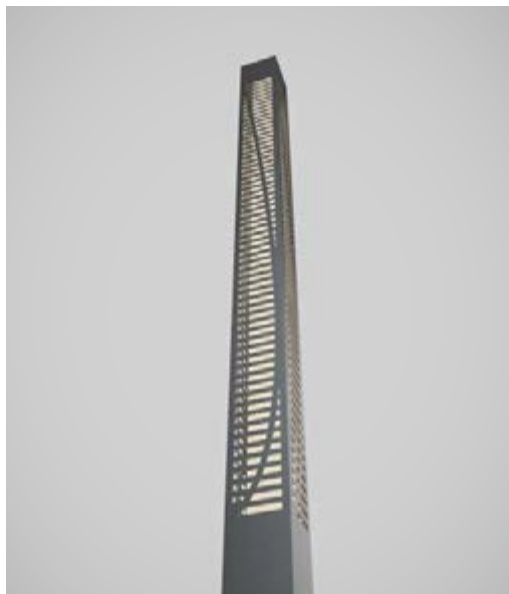

Base lange with anchor bolts or rooted in the ground.

Height

Available from 9.8 to 26.2 feet.

Shard

Product details

Made of stainless-steel powder coated with possibility to choose any RAL color.

Lightning source

Made of stainless-steel, designed to allow the use of LED modules with different optics and powers.

Ground fixing

Base flange with anchor bolts or rooted in the ground.

Height

Available from 9.8 to 19.7 feet.

Reno

Product details

Available in the following materials:

- Hot galvanized steel
- Stainless-steel
- Aluminum

painted with possibility to choose any RAL color.

Lightning source

LED strip.

Ground fixing

Base lange with anchor bolts or rooted in the ground.

Height

Available from 9.8 to 26.2 feet.

Smart Tower

Product details

Available in the following materials:

- Hot galvanized steel
- Stainless-steel
- Aluminum

painted with possibility to choose any RAL color.

Multiple SMART functions

- Surveillance cameras
- Speaker
- Emergency button

Lightning source

Spotlights and modules rotatable 360°

Ground fixing

Base flange with anchor bolts
or rooted in the ground.

Height

Available from 9.8 to 26.2 feet.

CORTEN STEEL

Corten steel is a type of steel capable of self-protection by forming a compact surface patina composed of the oxides of its alloying elements.

This characteristic offers significant advantages such as:

- Resistance to atmospheric agents
- No maintenance required
- No painting processes required

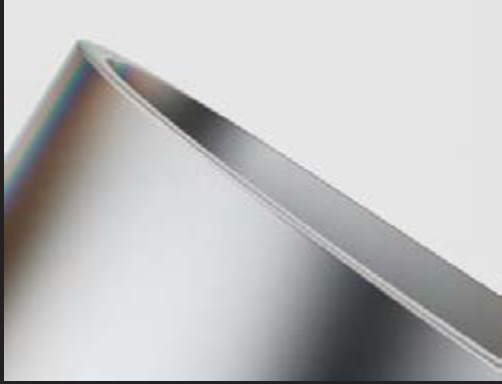

HOT GALVANIZED STEEL

Hot-dip galvanizing is a process through which steel pipes are coated with zinc. The zinc serves to protect the steel from corrosion. This procedure involves immersing the products in a bath of molten zinc.

Its main advantage is its cost-effectiveness compared to stainless steel.

EXTRUDED ALUMINUM

Extrusion is a process used to create objects with a fixed cross-sectional profile.

Aluminum is pushed or drawn through a die of the desired cross-section. The main advantages of this process are its ability to create very complex cross-sections with an excellent surface finish. Extruded aluminum can be protected from oxidation through painting or anodizing.

STAINLESS STEEL

Depending on the product, we use AISI 304 or 316 steel. Upon request, we can apply a surface finish of your choice, either brushed or mirrored.

It does not require much maintenance; Bottega7 recommends periodic cleaning with water and detergent.

CAST MATERIALS

Cast iron – cast aluminum – cast bronze

Cast iron is an alloy of iron and carbon, known for its high compressive strength and durability. It has excellent fluidity properties, allowing for easy creation of complex shapes.

Cast aluminum is extremely lightweight and resistant to corrosion.

Bronze is an alloy with excellent corrosion resistance. It is easily workable and has a pleasing aesthetic appearance.

RIM POLYURETHANE

Reaction Injection Molding (RIM) polyurethane is a versatile material created through a process where two liquid components are mixed and injected into a mold to form a solid plastic.

This material is lightweight, impact-resistant, and has good thermal and acoustic insulation properties. Unlike painted products, this material is colored throughout, making scratches and superficial damage nearly invisible.

WOOD

Wood is ideal for urban furniture due to its unique natural aesthetic. It is sustainable and, if treated, highly durable. We offer various types of wood, chosen based on the product and customer needs.

Although it requires maintenance, modern treatments make it easier to care for. Additionally, wood can enhance the psychological well-being of people in public spaces.

CONCRETE, STONE, MARBLE, CERAMIC

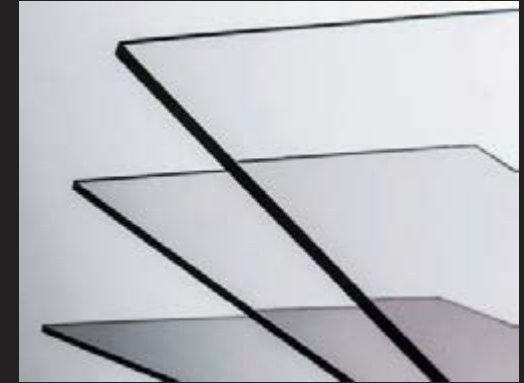

Stone and marble are used in urban design for their durability and natural beauty. They provide a sense of solidity and prestige to public spaces. They are employed for pavements, monuments, fountains, and other architectural elements. Their resistance to weathering and elegant appearance make them excellent choices in most cases.

HPC AND UHPC

Ultra High Performance Concrete (UHPC) and High Performance Concrete (HPC) are characterized by significantly higher performance compared to ordinary concrete, thanks to a low water-to-cement ratio. This ensures greater mechanical strength, high durability, and improved workability.

METHACRYLATE POLYCARBONATE

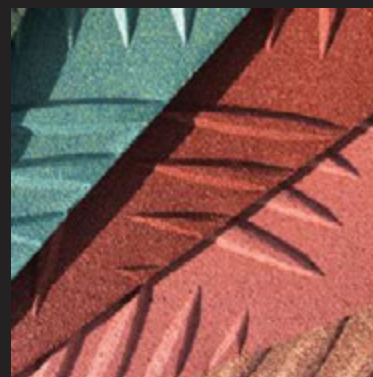

They are plastics that can withstand various weather conditions, managing to maintain their characteristics (thermal, of transparency and resistance) for a long time.

FINISHES

| FINISHES

POWDER COATING

It's a surface finishing process that uses resin powder. Its advantages include durability, eco-sustainability, efficiency, a uniform finish, and a wide range of colors.

LIQUID PAINTING

It's a finishing process that applies liquid paint to the surface. Its advantages include smooth and uniform finishing, precision, a variety of colors, and flexibility. Liquid painting can be applied to all items.

SUBLIMATION

It is a decoration applied through a film using sublimatic inks. It can be used to recreate effects that simulate the surface of wood, or metals such as CORTEN and more.

POLISHED FINISH

A polished finish is a process that makes the metal surface highly reflective and smooth. This is achieved through grinding and polishing with fine abrasives. It is valued for its elegant appearance and increased resistance to corrosion.

BRUSHED FINISH

A brushed finish for steel creates a matte surface with a uniform texture of fine lines, achieved through controlled abrasion. It is valued for its modern look and ability to hide scratches and fingerprints, making it ideal for both aesthetic and functional applications.

ENAMELING

Enameling is a coating process that applies a glass-like enamel layer to metal, which is fused at high temperatures. It provides a hard, glossy, and corrosion-resistant finish, available in various colors.
