

LILA

A disc of light suspended in the green of outdoor spaces. **Lila**, an extremely refined and discreet bollard, represents the perfect balance for those seeking contemporaneity and consider minimalism a feature capable of enhancing the decorative aspect of an illuminating product.

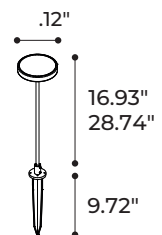

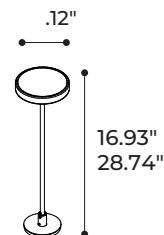

Lila is offered in two heights, characterized by a thin, treated, and painted steel stem that makes it adaptable to any type of vegetation or location.

A discreet presence when turned off and, thanks to the internally sandblasted transparent methacrylate diffuser, a luminous source that enhances the surrounding nature.
