

TASCA

Tasca is a lighting element designed for recessed wall applications a timeless fixture in its function, ideal as a step marker in walkways and outdoor spaces where efficient yet discreet lighting is needed.

Its compact dimensions and absence of visible screws make it a renewed and contemporary product.

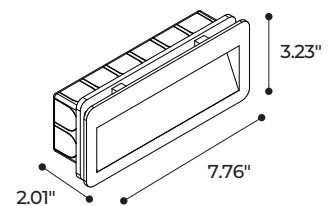

The structure is die-cast aluminum, treated with electrophoresis and coated with polyester powder, shield is aluminum made coated in white color, available as accessories in anodized natural aluminum or gold cabord.

The LED board is sealed on the heat sink with opal resin, ensuring protection from moisture as well as extremely simple installation, recessed mounting box is mandatory and can be separately order.
