ZERO DOME

Recessed spot light stainless steel AISI 316L radial emission flush light, stands out for its extreme compactness.

The satin-finish polycarbonate diffuser gives **Zero Dome** both extreme resistance and, at the same time, a pleasant, diffused emission.

Protection against water ingress is guaranteed by the internal resin filling process of the body, which completely seals the LED chip from moisture.

A product designed as a solution for flush installation in walkable floors or walls using its recessed box.
